# TRUSTED CLIMATE PARTNER

## *for consultancy & climate actions*

For every CO<sub>2</sub>e contribution, Greentripper provides a certificate guaranteeing that each tonne CO<sub>2</sub>e financially supported corresponds to a tonne CO<sub>2</sub>e reduced, avoided, or captured in the certified project. These certificates are audited annually by an independent third party, Forum Ethibel. While this is not mandatory in the voluntary carbon market, Greentripper offers this extra level of assurance to ensure transparency and reliability in your contributions.

Greentripper's consultants are certified through the BC Bilan Carbone® education program, confirming their expertise in CO<sub>2</sub>e calculations and the development of effective reduction strategies.
